EDUCATION

Assam Don Bosco University

Bachelor of Technology in Computer Science and Engineering - 8.12/10 CGPA

Assam, Guwahati

Aug. 2022 – Aug.2026

Miles Bronson Residential School

Senior Secondary (XII), Science - 85%

Borjhar, Guwahati

2022

St. Clare's Convent High School

Secondary (X), 95%

Borjhar, Guwahati

2020

PROJECTS

Hanzify - Sign Language Translation App | Flutter, Firebase, Python, TensorFlow

Link | Jan. 2025 – June 2025

- Developed a real-time ASL translation system achieving 92% validation accuracy using MobileNetV2 and CNN architectures.
- Integrated TensorFlow models with a Flutter frontend through Flask APIs to enable low-latency real-time predictions.
- Implemented a Firebase-based feedback pipeline to collect user corrections and improve model reliability over time.
- Presented research on the system at the Regional International Conference on Natural Language Processing 2025.

Mindcare - Mental Health Detection App | Python, Flutter, Firebase, ESP32

Link | Ongoing

- Built an EMA-based mental health chatbot integrated with ECG and GSR IoT sensors.
- Trained ML models using WESAD dataset to classify stress and anxiety levels.
- Deployed system with cloud integration for alerts and analysis.

RentWheels - Car Rental App | Flutter, Firebase, PhonePe

Link | Aug. 2024 – Nov. 2024

- Built a cross-platform car rental application with secure authentication, booking workflows, and PhonePe payment integration using Flutter and Firebase.
- Designed an admin dashboard to manage vehicle listings, reservations, and customer interactions in real time.
- Optimized Firebase database structure and app state management to improve responsiveness and scalability.

EXPERIENCE

Summer Intern, On-Site

July 2024 – Aug. 2024

Airports Authority of India, RHQ-NER

Assam, Guwahati

- Worked with enterprise networking, ERP workflows, and database management systems during on-site training at RHQ-NER.
- Observed and analyzed operational IT infrastructure used in airport management and communication systems.

Summer Intern, Remote

July 2024 – Aug. 2024

Indian Institute of Information Technology

Allahabad

- Developed Android applications using XML layouts and core Android components following standard mobile application architecture practices.
- Implemented UI workflows, activity lifecycle management, and local data handling during application development.

Summer Intern and Trainee, On-Site

July 2025 – Aug. 2025

Software Technology Parks of India (STPI)

Borjhar, Guwahati

- Developed IoT-based automation systems using Arduino sensors, cloud APIs, and Telegram bot integrations for real-time monitoring and control.
- Built BreatheWell, an air quality monitoring application using Flutter, Firebase, and ThingSpeak APIs for live environmental analytics and alert generation.

Web Developer Intern, Remote

Aug. 2025 – Dec. 2025

Stemcorp Dynamics

Assam, Guwahati

- Developed and deployed responsive full-stack web application features using modern frontend and backend technologies.
- Improved application performance through optimized API handling, database queries, and frontend rendering workflows.

RESEARCH

Regional International Conference on Natural Language Processing

2025

Giving Voice to Signs: A Mobile System for Real-Time ASL to Multilingual Speech Translation

Guahati University, Guwahati

- Co-authored and presented research titled "Giving Voice to Signs: A Mobile System for Real-Time ASL to Multilingual Speech Translation" at the Regional International Conference on Natural Language Processing 2025.
- Focused on real-time sign recognition, multilingual speech synthesis, and mobile deployment for accessibility applications.

LEADERSHIP

Indoor Sports Club

Aug. 2024 – June 2025

President

ADBU, Guwahati

- Led coordination and execution of sports events for D’VERVE 2024, managing event operations and volunteer collaboration.

Coding Club

Link | Aug. 2025 – Dec. 2025

Executive Committee Member

ADBU, Guwahati

- Developed and deployed a full-stack competitive coding platform for **Coding Wars**, a flagship event of **Prajyuktam 2025**, enabling real-time code submission and evaluation using the Judge0 API hosted on AWS EC2.
- Implemented secure code execution workflows, automated result evaluation, and participant management features for 25+ contestants during the event.

TECHNICAL SKILLS

Languages: Java, Python, Dart, SQL

Frameworks & Technologies: Flutter, React, Node.js, Flask, Firebase, REST APIs

Machine Learning & Libraries: TensorFlow, Scikit-learn, NumPy, Pandas, OpenCV

Cloud & Tools: AWS EC2, Google Cloud Platform, Git, Arduino, ESP32, VS Code, PyCharm
